

Construction

The GEMÜ 1436 cPos® is a digital electro-pneumatic positioner with an optional integrated process controller for the control of liquids, gases and steam in conjunction with pneumatically operated process valves.

The positioner exactly adjusts the stroke of the process valve.

When using the optional process controller the signals from a process sensor (e.g. flow, level, pressure, temperature) are detected and the media adjusted according to the specified set value. The membrane keypad and backlit display are arranged at the front of the housing. Pneumatic and electrical connections are at the rear. Integrated pneumatic throttles allow regulation of the control air to adapt the controller to different valve actuators and actuating speeds.

Features

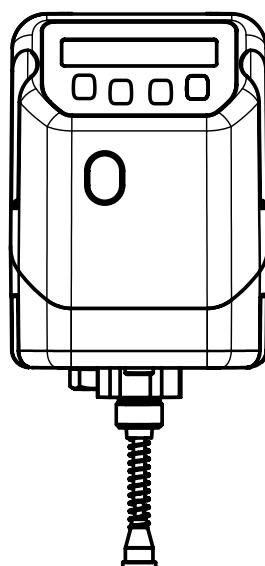

- Can be used for single or double acting linear or quarter turn actuators
- Multiple point calibration for optimum valve adaption
- Positioner and process controller are precisely synchronised with each other
- Parameterisation during operation
- Optimised initialisation and valve control (speedAP function)
- Direct or remote positioner mounting to the process valve

Advantages

- Digital inputs (option) for variable function control for automation
- Fieldbus interfaces e.g. Profibus DP, DeviceNet (option)
- No air consumption when idle
- Simple mounting to various valve actuators
- Access rights via different user levels
- Integrated Web browser capability
- Simple commissioning and versatile operating facilities
 - fascia keys
 - PC connection with Internet Browser MS® Internet Explorer
- e.sy-com interface for connecting an industrial modem
- Optional Bluetooth module

Controller data		Functions
Positioner		
System deviation	≥ 0.1% (adjustable)	- Positioner + process controller combined and synchronized with each other
PD parameters	adjustable	- Automatic or manual optimizing initialisation
Initialisation	automatic or manual	- Multiple point calibration for optimized valve control
Process controller	can be connected (version PA 01)	- Diagnostics, alarm messages
Controller type	continuous controller	- Operation possible when controller is active
PID parameters	adjustable	- 3 parameter sets can be saved and reloaded
Parameterisation	at the device: Menu selection context sensitive or help texts at the PC: Internet MS® Internet Explorer	- 3 user levels (access authorization)
Operating and display elements		- Operating hours counter, event list (for details see operating instructions)
Text display	Alphanumeric, 2-line display with 16 digits each with background light	- Digital inputs (option) for variable function control for automation
