

## Supports for hydraulic accumulators

### 1. DESCRIPTION

#### 1.1. GENERAL

HYDAC supports enable simple and secure mounting of all hydraulic accumulators. In addition to the standard product range, mounting technology for specific customer requirements and applications is available on request. For detailed information and notes, see:

- HYDAC Accessories product catalogue No. 61.000

#### Quick and easy – Accu-MOUNT

You can use our tool to find the matching accumulator mount, see: [www.hydac.com/Service/Online tools](http://www.hydac.com/Service/Online%20tools)

#### 1.2. USE

The optimum mounting type strongly depends on the use, the type and the size of the accumulator. Clamps, consoles and accumulator sets are all possible options. As they are safety equipment, our supports must only be attached and installed by trained staff.

The clamp quantities for bladder and piston accumulators given in the following overviews are HYDAC recommendations that take into account static use and vertical mounting including the corresponding support (e.g. HYDAC consoles).

More information on HYDAC hydraulic accumulators is available in the following catalogue sections:

- Bladder accumulators Low Pressure No. 3.202
- Bladder accumulators Standard No. 3.201
- Piston accumulators Standard No. 3.301
- Piston accumulators SK280 No. 3.303
- Diaphragm accumulators No. 3.100
- Hydraulic accumulators with back-up nitrogen bottles No. 3.553

#### 1.2.1 Bladder accumulators

Clamps, consoles and accumulator sets can be used for optimum mounting of the bladder accumulator. The console of the bladder accumulator is equipped with a rubber support ring.

#### 1.2.2 Piston accumulators

Clamps, consoles and accumulator sets can also be used for piston accumulators. In this case, the console is not equipped with a rubber support ring.

Please request the accumulator set for piston accumulators separately, as the design may vary considerably depending on the accumulator's nominal volume.

#### 1.2.3 Diaphragm accumulators

Weld-type diaphragm accumulators are fastened with an accumulator clamp and screw-type diaphragm accumulators with a console. Accumulator sets are not used for diaphragm accumulators.

### 1.3. MATERIALS

The following materials are available as standard:

#### Clamp

Fastening, foot  
Clamping band  
Insert

zinc-plated  
stainless steel  
PE/PP/NBR  
see Point 3.1.

#### Support

Rubber support ring <sup>1)</sup>

zinc-plated  
NBR

#### Accumulator set

Clamp  
Support  
Back plate

see above  
see above  
zinc-plated

Other materials (e.g. stainless steel) are available on request.

<sup>1)</sup> only for bladder accumulators

## 2. SELECTION TABLES FOR MOUNTING ELEMENTS

### 2.1. BLADDER ACCUMULATORS AND GAS PRESSURE VESSELS

The following table shows the recommended mounting type for each series and volume. The number of clamps can vary depending on the requirements and on the length of the hydraulic accumulator and is a HYDAC recommendation (see Point 1.2.).

Designation	Part no.	Nominal volume [l]																												
		SB330(H)								SB400				SB550 <sup>1)</sup> / SB690				SB500 / SB600		SB40(H)				SB35HB		SN360		SN600

others on request

## 2.2. PISTON ACCUMULATORS

The following table shows the recommended mounting type for each piston accumulator type. The clamp is selected on the basis of the accumulator's external diameter. The number of clamps can vary depending on the requirements and on the length of the hydraulic accumulator and is a HYDAC recommendation (see Point 1.2.).

To prevent deformation of the cylinder, clamps should preferably be mounted near the end caps.
