1) CF = Consult Factory where differential pressures are below 50 psid preventing seat leakage evaluation per Cashco S-1597 at 50 psid.													
2) Excessive differntial pressures have been derated to the maximum possible allowable working pressure corresponding with CF3M body material with NPT end connections at ambient conditions. Further derating may be necessary based on valve body pressure/temperature ratings.													
3) ATC-FO values for 5-15 psig bench range based on maximum 20 psig (1.4 barg) supply pressure with use of a positioner. ATC-FO values for 15-60 psig bench range based on maximum 75 psig (5.2 barg) supply pressure with use of a positioner.
