

## SPRINGBACK

## 2-POINT Spring-return actuator

3.10

### Application

The JOVENTA **SPRINGBACK** electric, spring return damper-actuator series has been specially developed for the motorized operation of safety air dampers (anti-icing) in air conditioning systems, smoke evacuation dampers and sealing dampers.

When the control signal is applied the actuator drives the damper to the operational position, while evenly tensioning the integrated spring.

After a power failure the stored energy in the spring immediately brings the damper to the safety position.

Manual operation is automatically cancelled when the actuator is in electrical operation.

The compact design and universal adapter fitted with limitation of rotation angle make this JOVENTA actuator highly versatile.

### Key features

- 2-point control
- Up to 5 actuators in parallel operation possible
- Plug-in terminal block connection
- Simple direct mounting with universal adapter on Ø 10 mm to 20 mm shaft or 10 mm to 16 mm square shaft.
- 77 mm min shaft length
- Selectable direction of rotation
- Limitation of rotation angle
- Manual positioning with crank handle
- 2 adjustable auxiliary switches
- See back page for settings
- Automatic shut-off at end position (overload switch)
- Energy saving at end positions
- Actuators available with 1 m halogen-free cable
- Customized versions available
- Devices meet CE requirements

### Accessories

- ZK damper linkage selection
  - ZKG ball joints
- (see data sheet 6.10)

## SPRING BACK

### Wiring diagram DA1.F(S)/DA2.F(S)

### Parallel connection

### Auxiliary switches (S)

### Angle of rotation

The 90° angle of rotation/working range can, through segments 1 and 2, be reduced by up to 30° from both end positions.

For details of installation and commissioning see Manual 3.10

### Dimensions in mm

### Changing the direction of rotation

The change in rotation direction is achieved by removing the adapter bush from one side and replacing it in the other side.

**Factory setting:**  
**Clockwise rotation.**

### Auxiliary switch setting

Factory setting

Switch **a** at 10°

Switch **b** at 80°

The switching position can be manually changed to any required position by turning the ratchet.

### Limitation of rotation angle
