

Mini 1

Dimensions of standard drive and fixing versions

[mm]

Standard version: Three-phase/AC, stroke 150 mm, transmission 1-stage, fixing A

The * marked dimensions specify the drive length of a standard drive (that means stroke length 150mm and transmission ratio 1-stage). For longer stroke length and/or different gear stages please add the corresponding dimensions **x** and **y** from the table below.

Gear	1:1	1-stage	2-stage	3-stage	+	Stroke length	150	200	250	300	350	400
x	0	0	20	40		y	0	50	100	150	200	250

Fixing version C

Fixing version D, E, F (Please define dimension I in order or inquiry)

So = no self-locking; Ss = static self-locking; Sd = dynamic self-locking

1-stage = 4,3:1

2-stage = 18,9:1

3-stage = 82,3:1

* Starting at stroke speed of 20 mm/sec. a brake is requested.

Duty cycle applies to 10 min. duty time.

For tensile loading applies the maximum stroke force of the particular stroke speed.

Actuators with single phase motors reach only 60% of the force and motor power of those with 3-phase motors and 15 % stated duty cycle.

The force and motor power stated at 40% and 60% won't change if the actuator is operated at 15% duty cycle.
