

## INCREMENTAL ENCODERS, GHT5\_1 RANGE

GHT5S14 encoders are specially designed for motorist application – heavy industry

- Ø14mm through shaft
- Easy mounting with DAC (Anti Coupling Device)
- Robustness and good resistance to shocks and vibrations
- High protection level IP65
- Resolution up to 2 500 ppr
- Universal electronic circuits 5V RS 422 and Push Pull 11 to 30Vdc

GHT5\_14 connection G3R (cable output), DAC 9445/015\* mounted on the bearing housing

\* to be order separately

58mm GHT5S14 encoders are designed to accept shaft sizes up to 14mm and can be mounted without fixation flange. Immobilization is achieved by a controlled deformation "DAC" with 2 fixation points (ref : M9445/015, accessory to be order separately) which allows an axial misalignment ( $\pm 2\text{mm}$ ), angular ( $\pm 3^\circ$ ) and radial ( $\pm 0,2\text{ mm}$ ). The "DAC" also allows for  $\pm 10^\circ$  of rotational adjustment for the alignment of the marker pulse, with the two "DAC" oblong holes at  $180^\circ$ . The final mounting is realised with 2 CHC M3 screws
