

Sewn construction and reliability at an affordable price

Eaton's SNAP-RING filter bags are suitable for a wide range of applications such as the filtration of paints and varnishes, inks, chemicals, solvents and many more.

SNAP-RING filter bags are manufactured to the highest standards. Materials must meet stringent specifications for filtration performance and media purity. Production under ISO 9001:2008 quality systems ensures reliability and repeatability from order to order, year after year.

Features and benefits

- Heavy-duty sewing thread and the metal seal ring are produced to Eaton specification
- The SNAP-RING seal ring adapts to any bag filter housing
- Material is free from silicone and crater-forming substances¹ (excluding HT material)

- Eaton strongly recommends the use of an insertion tool that facilitates the insertion of the filter bag into the bag filter housing and ensures the correct alignment of the filter bag inside the restrainer basket
