

Limit switches

Flameproof - Group IIC XCWD series

The XCWD limit switches is a safe bet for controlling movement. It benefits from the latest developments: modularity, compactness, a very broad range of actuators.

They are designed for intensive use and a very good repeatability.

They are provided in complete assemblies or variable composition with:

- 2 or 4 electrically separate snap action contacts
- Heads that can be adjusted from 15° to 15° on 360° relative to the body
- can substitute the previous range XCWA and XCWF
