## εCOOL COOLING UNITS 1500 W

DTI: for partially recessed mounting of the cooling unit in the door or side

DTS: for outer mounting of the cooling unit on the door or side

- robust: steel cover, easily paintable
- compact design for smaller cabinets or to cool hot spots
- very high energy efficiency ratio (EER)
- interface to use εCOOL-Plant software at the Multi Controller (MC) model with operating hours counter and error history observation for preventive maintenance processes and exact error analysis
- service friendly due to direct access to the PCB and the fans, thus 80 % shorter repair times
- additional temperature sensor in the Multi Controller model allows the deactivation of the internal fan and condensate evaporation for additional 10 % energy savings and service life extension of the fan
- optional pre-filter upgradable with aluminum, vlies or fluted filter
