- **Servo or face mount (1.5" diameter)**
- **Up to 1024 PPR with optional marker pulse**
- **Rugged all-metal housing**
- **Shielded cable standard**

The Series E15 is a totally enclosed, easy-to-install, incremental encoder designed for commercial and industrial applications with limited space. It is an industry-standard Size 15 (1.5" diameter), servo or face-mount unit with a rugged, metal housing.

The Series E15 includes precision bearings, an O-ring seal, and a choice of 1/4" or 1/8" diameter stainless steel shaft.

Series E15 incorporates the latest in microelectronic packaging, LED light sources, and matched sensors. Outputs are designed to be compatible with most 5V TTL circuits with options for higher voltage 12 and 15 VDC. Shielded cable is standard. Line drivers with complementary outputs are available for longer cable runs and/or higher ambient electrical noise immunity.
